Special workshop:

Characteristics of Materials plays a vital role in the native technique used to build a Natural Building. Constructing with justification to properties of a material and its performance in various contexts is the fundamental to any vernacular method identified anywhere. So to start from basics, learning about a material is the foremost.

This course is exclusively dedicated to learn about techniques of a material. What are the different kinds of same material available in various parts of the country, which is suitable for what kind of work, how to procure it, how to store it rightly, how to treat the material before use, what sort of preparation is needed, will be shared through hands-on and prototypes. The specific procedure of construction, its significance and benefits, how to do it, stages of finishing and how to repair and maintain it, will also be done through totally hands-on sessions. The course can be specialized on topics such as **Bamboo, Roofing, Finishes, Flooring or Wall systems**. This course is preferably suited for people involved with Owner's Build, Professionals and Artisans.
